# Contempra

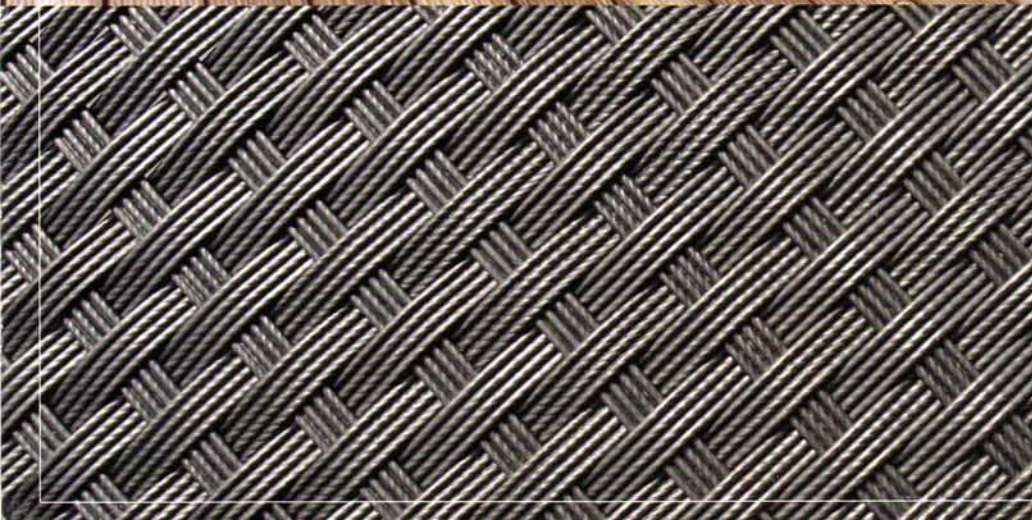

designed by ALTO

**AQUA**  
LEADER

# Contempra

designed by ALTO

## TECHNICAL INFORMATION:

- All metal parts are made of higher-gauge steel for superior strength over the entire pool frame...the strongest in the industry.
- To make this possible, Aqua Leader has developed a reinforced steel core with a magnesium, aluminum and copper coating that increases rust protection by 72%.
- Before this protective coating is applied, the steel core is pre-treated with a micro-crystalline zinc phosphate. This prevents oxidation reactions caused by the environment and provides high-standard resistance to corrosion.
- All structural parts are manufactured by an exclusive "Double Coat" system that includes a heat-setting polyester compound to ensure long-term appearance and durability.
- The printed pattern is then applied, using a mixture of liquid inks and embossing powders. This allows Aqua Leader to show enhanced detail in each pattern. The result is a finished look superior to any competing brands.
- AQUA LEADER is an award-winning manufacturer with a major reputation for innovative swimming pool design. All these features will exceed your expectations and provide protection superior to any other swimming pool on the market today.
- Your pleasure is our major goal to achieve.

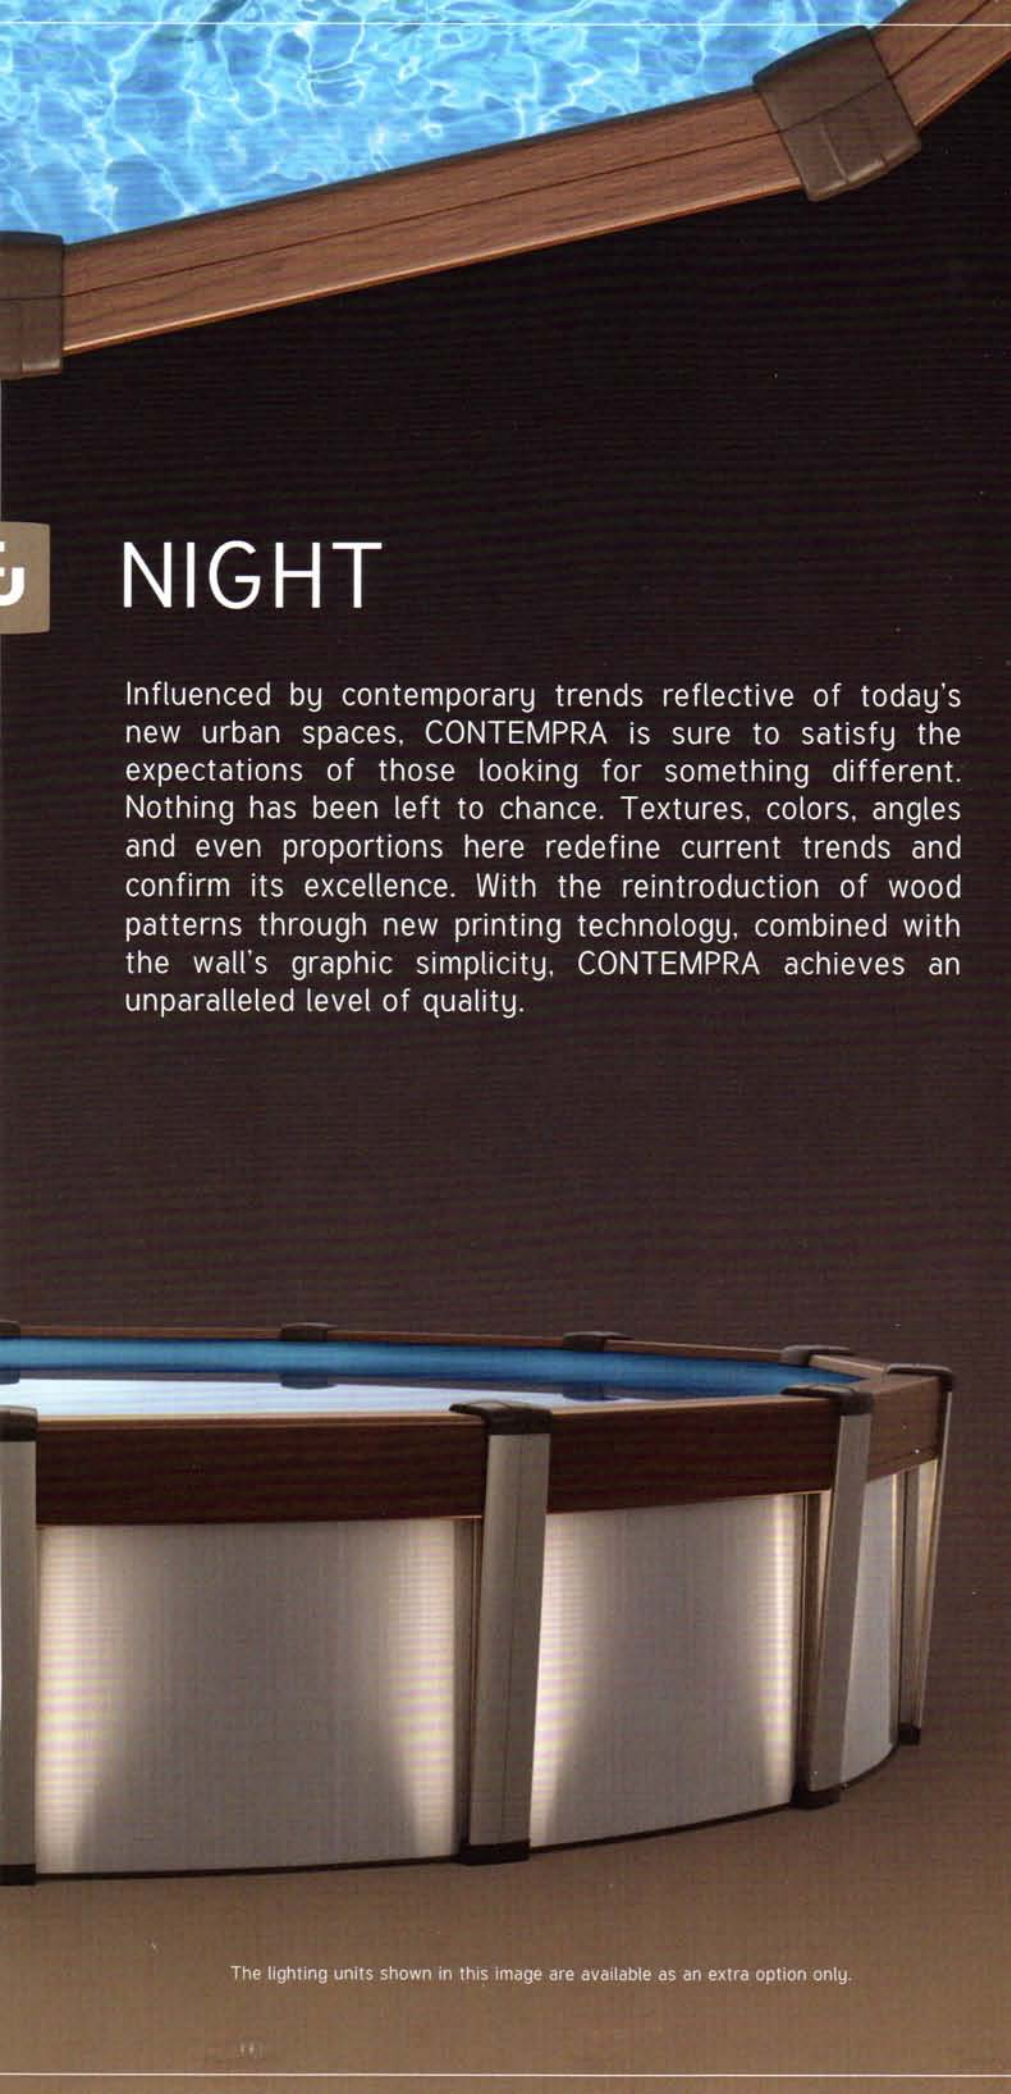

# DAY

Created to satisfy the tastes of increasingly sophisticated customers, AQUA LEADER and ALTO DESIGN once again redefine the industry standard. Having strongly influenced design and innovation in this industry for over 25 years, they introduce the refinement of all refinements...the experience of all experiences. Introducing CONTEMPRA, a totally different and totally impressive class of pool.

Experience at your service!

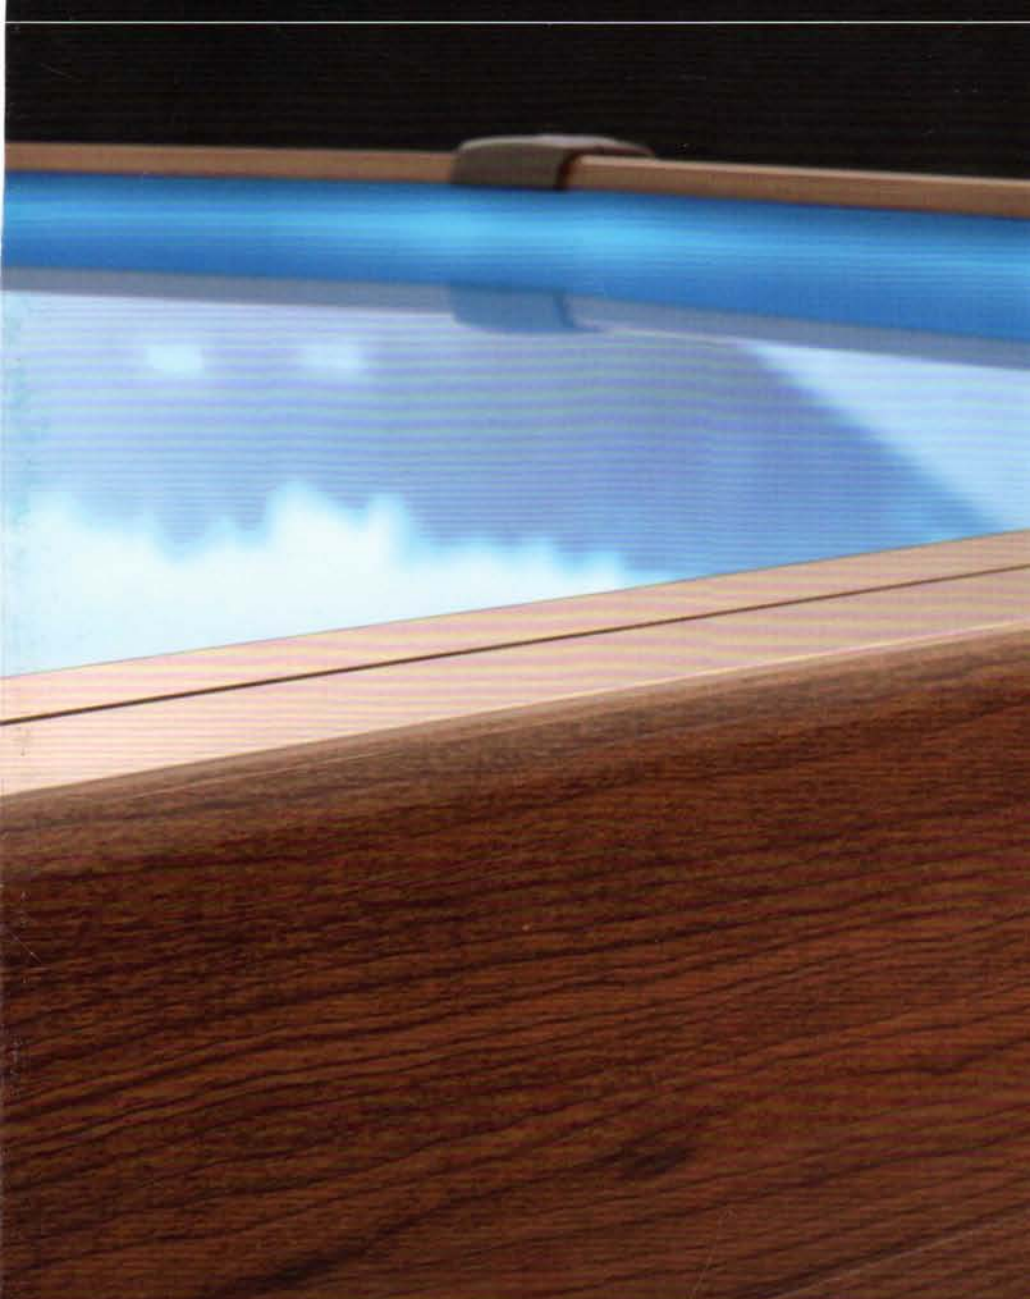

# NIGHT

Influenced by contemporary trends reflective of today's new urban spaces, CONTEMPRA is sure to satisfy the expectations of those looking for something different. Nothing has been left to chance. Textures, colors, angles and even proportions here redefine current trends and confirm its excellence. With the reintroduction of wood patterns through new printing technology, combined with the wall's graphic simplicity, CONTEMPRA achieves an unparalleled level of quality.

The lighting units shown in this image are available as an extra option only.

## COLORS AND FORMATS

CONTEMPRA seats are printed with an evocative walnut pattern. Structural components are bronzed steel in appearance with metallic highlights, while its polypropylene connecting parts are enhanced by a chocolate brown color.

The wall is printed with a light tone-on-tone graphic, allowing the structural components to appear to full advantage.

Available in round version only: 15, 18, 21, 24, 27, 30 and 33-foot diameter.

SHALLOW WATER:  
DO NOT JUMP / NO DIVING
